

## TECHNICAL DATA SHEET

### **DUST CONTROL DSL**

**PRODUCT DESCRIPTION:** DUST CONTROL DSL is a surfactant formulation for dust suppression of dust generated in mining and rock crushing operations. The product controls fugitive dust by surface tension reduction and by binding the dust to the surface of the material.

This product is not designed for the suppression of road dust.

**APPLICATION:** DUST CONTROL DSL is recommended to be applied at a rate of 200 lit per 20,000 lit of water.

The diluted product can be used in:

- Spray system
- Transfer points
- Conveyor systems
- Crushers and washing operations ( low foaming)

Typical properties:

Appearance:	Hazy brown liquid
Density @ 20°C	0.99-1.05 g/cm <sup>3</sup>
Boiling point	100°C
pH	6.0-7.0

This product is water based, non hazardous and fully biodegradable.
