

**OFF LIMITS**

**DOG AND CAT REPELLENT.**

This product has been specifically formulated to repel dogs and cats from new and established lawns and gardens as well as from indoor areas from which we want to keep dogs and cats away. It contains natural, plant derived active ingredients, which are extremely objectionable to dogs and cats.

The active ingredients present in the product are totally harmless to pets.

The product can also be used for toilet training of puppies and kittens and to prevent male cats from spraying in or outside the house by simply applying a fine sprinkling of the product in areas from which we want the animals to be excluded.

**HOW TO USE:** sprinkle the DOG AND CAT REPELLENT on the area to be protected. Repeat the treatment every week or as long as necessary. Eventually after a few treatments, the dogs or the cats will become conditioned to stay away from the area, even after the treatment has been discontinued.
